

## Sample International Internship Placement Sites

The Washington Center (TWC) serves students in all majors with interests in a wide variety of fields. Participants in TWC's internship programs are placed in one of over 500 partner organizations around the Washington, D.C., metro area in the government, nonprofit and business sectors. This list includes only a subset of organizations at which TWC students have interned in the recent past. TWC participants work with an internship advisor to guide them throughout the internship matching process to find a position that fits their unique interests, skills and background. Available sites vary by student and semester.
